Synthetic PDF for PDF2Obsidian README demos

This document is generated for open-source documentation. It contains a cover, table of contents, body sections, a simple table, a checklist, links, and five synthetic diagrams.

Synthetic diagram 1

Local-first overview

Safe README demo asset

No real course, PDF, transcript, or user data.

Privacy note: this sample contains no real lecture title, no paid PDF content, no private note path, and no copied transcript text.

Table of Contents

1. Local-first conversion workflow
2. PDF to Obsidian Markdown
3. Table and image handling
4. Lecture transcript study notes
5. Review checklist

Safe README demo asset

No real course, PDF, transcript, or user data.

The table of contents gives the converter headings, ordered content, and page boundaries to preserve in Markdown.

1. Local-first Conversion Workflow

PDF2Obsidian reads files from local disk and writes Markdown to a local output folder. The basic conversion path does not require login, cloud upload, or external AI APIs. This section gives the converter paragraphs and a meaningful diagram.

- Choose a PDF, image, or transcript file.
- Convert the file into Markdown and WebP assets.
- Move the generated folder into an Obsidian vault.

PDF conversion flow

Safe README demo asset

No real course, PDF, transcript, or user data.

2. PDF to Obsidian Markdown

The converter restores searchable text, headings, lists, simple tables, links, and embedded images where practical.

Input	Expected Markdown result
PDF heading	## or #### heading
Simple table	Markdown table
Embedded image	WebP asset reference
Complex table	WebP fallback image

3. Lecture Notes and Review Checklist

Lecture subtitles can be converted into a study note with overview, key concepts, timeline sections, review questions, and an execution checklist.

- ☐ Check that Markdown headings are readable.
- ☐ Check that image links open in Obsidian.
- ☐ Check that table content is not lost.
- ☐ Check that the conversion report has no warnings.
- ☐ Check that only synthetic documentation samples are committed.
